Ideal solution for efficient and cost-effective wire, cable and component identification.
Used together with different FLEXIMARK® Collars, Snap-on collars and Cable tie collars.
Printed with CAB thermal transfer printers together with FLEXIMARK® Software.

Technical data

Materials:	Halogen free polyolefin (white) and polyolefin, vinyl coloured (zerex™)
Operating temperature:	-40°C to +90°C
Colour:	White, yellow
Resistance:	Water, humidity, alcohol, oil, grease
Recommended ribbon:	R71 (832591604)

Mounting:

FLEXIMARK® TMB labels are mounted into FLEXIMARK® Collars, Snap-on collars, Cable tie collars and Collars for component marking.

Other product data:

ETIM Classification: EC001288

Advantages:

Print your own marking when you need it.
Create permanent marking easily and quickly by printing on the markers with thermal transfer technique.
Mounting without any use of tools.
Text with long term durability thanks to thermal transfer printing.
Thermal transfer printing method increases smudge, scratch resistance and resistance to oils and chemicals.
The label roll gives a better overview over the printout.

Delivery:

Delivered on a roll adapted for thermal transfer printing.

Related products

FLEXIMARK® TMB labels are printed with CAB thermal transfer printers (available in Fleximark assortment).
To make the printing process more efficient, the usage of FLEXIMARK® Software, label software for printing marking systems, is recommended. The FLEXIMARK® Software is also included in the package when you purchase a printer from Fleximark AB. It is important to choose the right ribbon for the right marking. We recommend R71 ribbon for durable thermal transfer printing with FLEXIMARK® TMB labels.

Within the FLEXIMARK® Marking assortment there are different collars available, both for wire, cable and component marking.

Transparent collars and Snap-on collars for cable and wire marking are mounted direct on the cables and wires. Collars for component marking are mounted in different mounting list or with adhesive. Cable tie collars are mounted with plastic cable ties directly on the cables.
